

Setting up your Smallworld+ HD box

Welcome to Smallworld+ HD.

Please follow these instructions to set-up your new Smallworld+ HD box.

1. Getting started
2. Connecting your Smallworld+ HD box
3. Inserting your viewing card

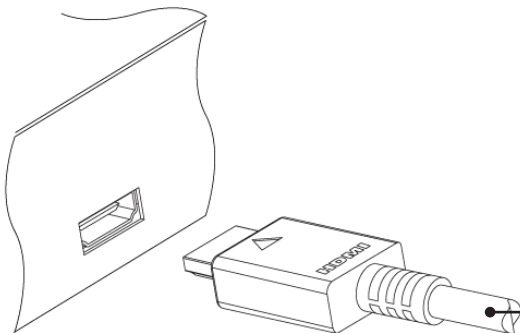

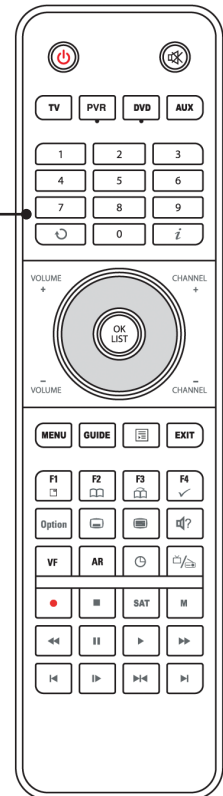

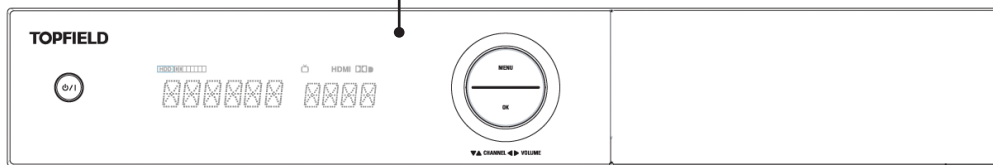

Note: These set-up instructions only apply if upgrading from Smallworld KAON to Smallworld+ HD in the same location.

If you have Smallworld multiroom and wish to enjoy HD in another room please contact us on 08000 706 150.

1. Getting started

Unpack your Smallworld+ HD box and make sure you have all the essential equipment from Smallworld.

Set Top Box & Remote Control

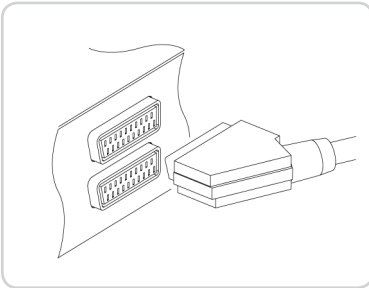

HDMI cable (2 Metres)

Before you set-up your Smallworld+ HD box, please ensure you complete the following:

- Switch off your current Smallworld box and unplug from the mains.

2. Connecting your Smallworld+ HD box

Carefully move your TV and KAON box away from any obstacles ensuring no cables are overstretched or pulled out. Once you can reach all of the connections at the rear, unplug and set aside your KAON Smallworld box and replace with your new Smallworld+ HD box plugging it in to the mains **but do not switch on**.

Remove SCART lead

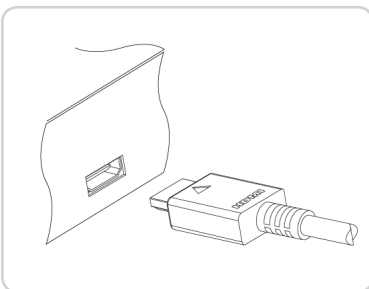

If you have a HD TV you can remove the SCART lead completely from your TV. It will be replaced by your HDMI cable.

N.B. If you do not have a HD TV leave the SCART cable in your TV and plug the other end into your new Smallworld+ HD box .

Connect Smallworld cable

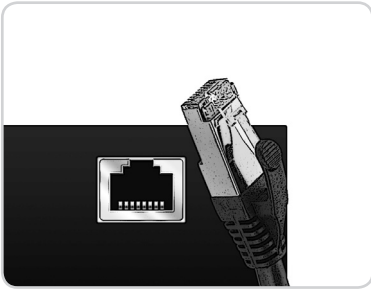

This is the existing Smallworld cable that was used to connect your previous box. Ensure you do not bend the copper wire in the middle of the connector and that you screw the cable all the way onto the CATV to cable adapter. Now connect the completed cable into the back of the box until it is secured tightly.

Connect HDMI cable

To be able to enjoy TV in high definition you must use your HDMI cable to connect your Smallworld box to your TV. Ensure the cable is firmly connected to both your TV and smallworld+ HD box.

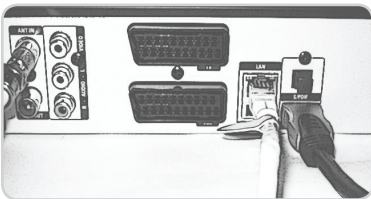

N.B. Not required if using the SCART lead to connect to your TV.

Connecting network cable

To ensure use of the full features you will need to connect a network cable directly from your Smallworld+ HD box via a modem or a router.

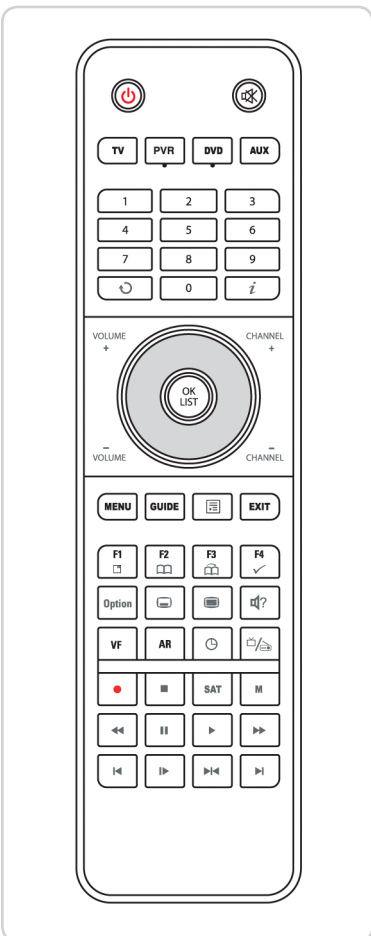

N.B. If you are connecting the cable direct from the modem you will need to contact customer services to activate the Smallworld+ HD box on the network. This is NOT necessary if using a router for connection.

Completed connection

Once you have completed all of the above steps, the connections at the back of the Smallworld+ HD box should match the final set-up image.

N.B. the image shown is for HDMI setup if you are using a SCART lead your final setup will be slightly different.

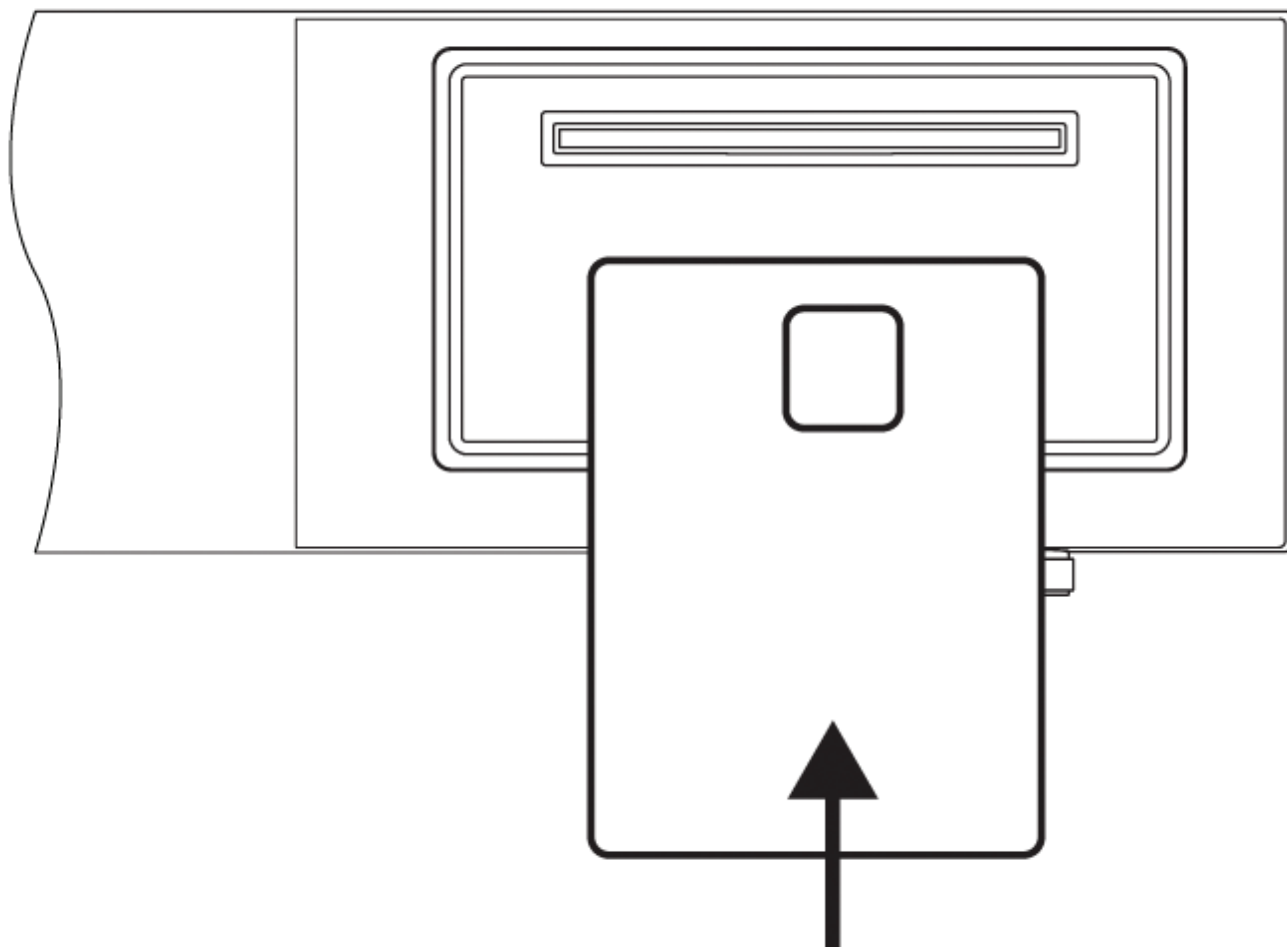

Remote Control

Insert the batteries provided into your new Smallworld+ HD remote control.

3. Inserting your viewing card

Drop down the flap on the right hand front panel, ensuring the chip is facing upwards; switch your TV and Smallworld+ HD box on at the mains.

Bring your TV and Smallworld+ HD box out of standby, press the  button on the front of the box and ensure the red light goes off, this can take a minute. (Ensure switch at rear of Smallworld+ HD box is in the ON position.)

You may need to use your TV remote (not your Smallworld+ HD remote) to select either the SCART or HDMI input on your television. Please refer to your TV user manual to confirm how this is done.
